SPARK

Smart PAJSK & Activity Automation System

Prepared By: **Tong Qian Yi**

What is SPARK?

SPARK helps teachers reduce time spent on paper forms, spreadsheets, and scattered social media messages by bringing key co-curricular tasks into one system:
SPARK 将重要的课外活动工作集中到一个系统，减少纸张、表格和零散讯息的使用。

- **Attendance Record 出勤记录**
- **PAJSK Record PAJSK 记录**
- **Co-curriculum Events/Activities 课外活动／项目**

Example:

Problem: Teachers call out names one by one.
问题：教师逐一叫名记录出勤。

Solution: Face recognition marks attendance automatically.
解决方案：人脸识别自动记录出勤。

How does the face recognition works?

1. Admin adds student face data to the system.
管理员将学生人脸资料录入系统。
2. Teachers create an attendance session.
教师建立出勤场次。
3. Students face the webcam for scanning.
学生面对摄像头进行扫描。
4. The system matches the face and marks “ATTENDED”.
系统比对人脸并标记“已出勤”。

Why make SPARK?

Many Malaysian schools still manage activities, attendance and PAJSK records manually.
许多马来西亚学校仍以人工方式管理活动、出勤和 PAJSK 记录。

Easier Way to understand:

It's a system that will decrease work for teachers. It does:

- Club Management
- Attendance Tracking
- Student Role Assignment
- Achievement Recording
- PAJSK Score Calculation
- NILAM Reading Records
- Certificate Submission and Review
- Parent Progress Monitoring
